Rough Guide

Exhibition HT Rose: This is a rose which displays good form, freshness, size, substance, brilliance and purity of colour, has <u>a high-pointed centre</u> and, at the time of judging, is at a stage of maximum beauty. The centre of the bloom should appear high and well defined and when viewed from above the outer petals of the bloom should display a circular outline. It must be staged with its own stem and foliage.

Decorative HT Rose: This is a rose which displays <u>petals</u> of good substance which are <u>gracefully arranged in its most decorative phase</u>. Form is not a criteria, although symmetry is important. It should be displayed with foliage and side buds are permitted.
